BOARD OF EDUCATION

In the background of every organization are the people who are seldom seen but vitally important. The members of the East Deer-Frazer School Board are makers of policy, managers of system, and mappers of plans. They supervise the school calendar, the employment of teachers, the maintenance of school facilities, and the laws governing the school. Outstanding men of our community, these representatives ably execute their responsibilities and successfully run our school.

Mr. McCaskey, a graduate of the University of Pittsburgh and an employee in the Technical Services Division of Gulf Research, is the first Edfra graduate to serve on the Board.

HEALTH SERVICE

Today's child needs good health because health largely determines the factors of interest and endurance. Interest and endurance largely determine efficiency. Efficiency during youth, studies, games, and maturity largely determines happiness. Happiness largely determines disposition and attitude.

Although the efforts of the school are to supplement the responsibility of the home and community for the health of children, the members of the board of education, who represent the parents and taxpayers, insist that a comprehensive, child-centered program functions to help you, our students, achieve and maintain a high standard of health.

. . . COUNSELING AND GUIDANCE SERVICE ARE HELPFUL . . .

The aim of guidance is to help you achieve your own highest level of personal, civic, and occupational competence. Success for you includes mental, physical, vocational and aesthetic development, as well as those inner satisfactions which come from a well-adjusted life.

Guidance activities here in Edfra, under the direction of Dr. Marcus T. Allias, are based upon the recognition of individual differences, the basic concepts of human growth and development, the diversity of present-day educational opportunities, the complexity of modern occupational life, the importance of human relations, the right of the individual to make his own choices, and the realization that the adjustment of an individual to his life situations is an ever changing process.

NATIONAL MERIT SCHOLAR

Dear Jack

On March 17, 1962, you brought honor and distinction to our class and high school by achieving the status of National Merit Scholar, and receiving the Pittsburgh Plate Glass Foundation Scholarship to Princeton University.

You achieved this by participating in the most difficult academic competition with 576,435 students in 15,461 private and public schools throughout the nation. We know because we were among those who competed.

Jack, we hope that this is merely the beginning of a distinguished career for you.

FOOTBALL

Dear Mr. Heller

We, the students of East Deer-Frazer High School, are proud of the honors you have brought to our Alma Mater! Among these are:

Establishing Edfra's reputation for fair play

Inculcating the ideals of sportsmanship

Assisting in the winning of a Class B Football Championship

Winning the Allegheny-Kiski Valley Class B Conference in 1954

Instilling unflagging enthusiasm for playing the game, regardless of its outcome

You have had a great influence upon students, not only those who have engaged in athletics under your guidance but all others who have studied here.

Mr. Heller, you have truly exhibited the fine qualities and ideals that athletes are expected to possess. You are All-American—not only as a football player, but as a teacher and a gentleman as well.
